

Testimonials

The following are testimonials and descriptions of how people use InfoRecall. This is of course just a sampling. We have many thousands of users: Individuals, Professionals, Corporations, Academics, Institutions and Writers etc. etc. who put InfoRecall to good use for their particular needs.

We have also received many 5 Star Awards

Here are some users who have written to us

Dr. Steve Messier PHD, Brooklyn, NY

I first discovered InfoRecall on the internet then bought it after trying it out. It powered me through my doctoral dissertation and now is my main data base for personal stuff, and as a multi-folder index of all my (psychology) patients. I could not live without it and will be buying the disk version on your website soon. I hope you have made a lot of money on it!

Moses Gomez, Austin TX

Congratulations on an excellent product. I've had a chance to review Version 7.0 and it blows away anything in its class (the one app that comes close is HyperNotes (Amber Timbre Software) but it is buggy, doesn't have half the features as your product and it is not being supported anymore by its developer). The registration price for Ver. 7.0 seemed a little steep at first but after reviewing all the features I had to admit that it is the best Freeform PIM/Database available at any price.

Kerry Jorgensen, Schleswig IA

InfoRecall is one of my all-time favorite programs and I could hardly function without it now.

Douglas Allam Orion, MI

Just to let you know, this latest version of InfoRecall is wonderful. I had an older version and thought it was great but this version blows it away.

Ralph Bednarski, Germany

What do I use InfoRecall for?

Better ask, what I don't use InfoRecall for <g>. I've build my own knowledge base, training base, private and company mail, to-do-list, all those paper sheet-info's in a file. It's working great. Especially with the search index it's really quick.

Rodney Hurda, McHenry, IL

I have been using your program through various versions for probably 10 years. I'd be lost without it. It's a great program.

Peter G. Roode, Gainesville, F

I just LOVE your hyperlinks and use them frequently to point to different documents, to different places in the same document, or to give one "pop-up" text.

Jochen Weiß, Germany

Thank You for program InfoRecall. This program is super.

Kumar, Rajeev, Newark CA

I am a technical sales person for my company and I will use it for a couple of different tasks. First to manage my account base and track issues/opportunities and second to begin a personal knowledge base for myself.

John P. Kapeleris, Australia

I have been trying to set up an appropriate Personal Information Manager (KnowledgeBase) a repository of information to store and retrieve bits of information, publications, internet searches, snippets from newsletter articles, brief text messages.

Brian Schmitt, U.S. News & World Report

InfoRecall makes me smarter, and better at remembering things. And by giving us an effective way of sharing knowledge it makes my department smarter. For example, someone stopped by the other day to ask me if I'd heard of a special project we were doing with a large Internet company. I hadn't but a quick search of InfoRecall pointed me to two documents that captured work my colleague had done including a link to a .pdf of the ad they were looking to run. I looked like a genius!

Bill Hathaway, Minneapolis, MN

I have been using InfoRecall for quite a while now. It is very handy for keeping track of random information in a easy to find retrievable format. Your program fills a nice niche.

Stephen Ernst, Berkley, MI

I use your software to keep miscellaneous notes on (a) household items, such as: purchase dates of appliances, when repairs were made, painting contractors, plumbers, heating & cooling contractors, etc., (b) financial items: checking and savings account numbers, insurance policies and contacts, mutual fund contacts, etc., (c) favorite music titles, CDs, etc., (d) keeping track of computer software and associated version levels, (e) and the list goes on. I also volunteer some of my time to an organization which provides traffic related assistance to area motorists. I keep track of freeway mile markers and their relationship to cross streets, locations of hospitals, court houses, municipal buildings, phone numbers of government organizations, etc. The search engine is quite valuable in retrieving this information.

Dianne Whalen, United Kingdom

We are a small recruitment company and we use the InfoRecall to store all CV's we receive, we can then search the database for candidates when we are asked to find someone with a particular skill set. So far, the system has worked as we wanted it to.

Michael Jensen, Denmark

I use the InfoRecall for registration of a variety of data, such as: Energy reports, Staff data, Building parts, Cleaning products Network data, Data for my Labor Union work and much more

Forrest Aldridge, Derry NH

I have ADHD (Attention Deficit Hyperactive Disorder) and I have a big difficulty sorting out data. I collect a lot of information. If I don't have somewhere to place it, it ends up on post-it notes, and then in piles of paper. This sort of tool helps me translate those piles of random data into something online -- which, at least, I can search through :) me translate those }

Larry Hubartt, Winona Lake IN

I really like InfoRecall a lot; that is why I quickly ordered the upgrade without hesitation. The main use I have for it is indexing both my personal files at home and my office files at work. With it I am able to locate paperwork and historical files, instantly

David Sherwin, Ottawa ON

I appreciate the free-form entry, the word-processing capabilities, and the unlimited document size because I use it for Minutes of meetings, personal writings, and, since I am a minister, I use it for worship materials, prayers, worship services, etc. My work is with words, not numbers, so InfoRecall is perfect.

Joonsoo Kang, Export-Import Bank of Korea

I am using InfoRecall for memos of what I read, think, do and store for later use. Someday I will write personal essays using the data stored and this management of data is its key instrument.

Leo C. Foster, Stockton CA

I have quite a lot of files for my hobby (Flight Simulations) There are a lot of subdivisions such as Texture, Panels, Model, Gauges, Ect. Along with the Airplanes themselves. I have not checked out all the things that your system will do, but I assume that it will do the jobs just fine. I had a previous version long ago and my hard drive went out west and I lost it and couldn't remember where I had found it. Seeing it again really made me happy. You have a great product. Keep up the good work.

Helga Lynn Cronje, South Africa

I am currently employed as a research assistant/information executive and online researcher for TBWA Hunt Lascaris, an affiliate of TBWA Worldwide. I'm using InfoRecall to track all the information we accumulate as Market Researchers and also to archive our current small but growing library.

Glenn Johnston, Lidcome NS

Re. my intended use for InfoRecall, I am currently employed as the "Assets Operations Manager" at Stadium Australia in Sydney. As you are probably aware this is the Stadium which will be used as the Venue for the 2000 Olympics Athletics events, the Opening and Closing Ceremonies and the Olympic Soccer Finals. The Stadium has been designed as a Multi-use facility and we have a full season of football and athletics events coming up before the Olympic period. "Asset Operations" involves mainly the building services management and co-ordination and re-configuration of the building to suit whatever event or function is being held.

Ruud de Ridder, The Netherlands

I use InfoRecall for genealogical research, the history of the genealogy, press-cutting and pictures.

Lynn Neese, Bremerton WA

Your system is just wonderful for putting together writings on my astrological charts because I save what I have written about each planetary placement and when it applies to another chart I can pull it up and don't have to repeat it or go through the hassle of switching files to find it. Always at my fingertips! It enables me to write very large reports in a very short period of time that appear to have taken hours! It's wonderful for the insurance work too as I have every carrier and agent information quickly, and it keeps track of order on every client I've seen for billing.

Betty G. Bender, Melrose, MA

As for my usage: everything I need at a moment's notice. All personal info on family, friends, to do lists not to be believed. All sorts of computer info re problems, things to do on net, tracking hobbies, planning home projects, tracking all medical problems, etc., for my family, parents, etc. Keeping a person journal. I have access to it at all times - even for quick notes. And now, with my new computer, it's moving quickly again.

Jim Speer, Dean, Austin State University

My chief present use of the database is to copy on-line abstracts from the research literature into the data base, then add to those pages my notes from reading the actual articles, books, etc. Then the search feature works very well for recovering topical information from my readings. Much better than index cards!

Dr. Werner Tabarellin General Consul of Austria

I use InfoRecall as a kind of PIM (instead of InfoSelect from MicroLogic). It's easier to use and more practical for my purposes; i.e.: I have to read a lot and found it convenient to store and retrieve bits of information in InfoRecall. With InfoRecall I can have a Hyperlink to those notes; A strong selling point for you!

James D. Boyd, Ph.D, Galveston IN

I use it to keep track of information that I use to store information about a number of topics that I am interested in, in the education, political and scientific realm. I write fairly often to the newspaper and I am able to document my statements and positions using InfoRecall to find the information that I know I have read in the past. I love the free form nature of it. With the WWW now will often cut and paste certain things right into it. Saves lots of typing.

Goran Tonstrom, Sweden

I have been using InfoRecall since the mid 90's. I know of nothing better. Thanks!

I use it in my work as a journalist/writer. To collect information, sort it and finally put it into the texts. I also find it useful for outlining stories or structures in my work. Its free form makes it easy to find later what I stove away.
